

Quicken? Quantize?
Get them both, plus more, only from Q.

A trippy and trancey experience right at home? *Every Extend Extra Extreme* ("E4") will take players on a journey that is visionary, exuberating and will even let players play to their own favorite music! The latest creation from Q Entertainment, best known for its blockbuster franchise *Lumines*, E4 is a unique shooter where the goal is to self-destruct, create large chain reactions by defeating the enemies, which will ultimately extend the life of the game. **E4 will be available for download on Xbox LIVE Arcade this Wednesday, October 17, 2007 at 9:00 a.m. GMT (2:00 a.m. PDT) for 800 MSP.**

Timing is everything in this simple but highly addictive game. Detonating at the top of a beat will result in Beat Bonus, a powerful blast with multiplying points. Enemies will leave behind various items and picking them up at the right time could change the next phase of the game. E4 also adds a new Shield system where the player is invincible for given amount of time, encouraging them to position their craft in a perfect spot to detonate and pick up items as quickly as possible before the Shield time runs out. Driven by its mixture of outrageous, mind-bending visuals presented in HD with the support of 5.1 surround sound, E4 will provide a clubbing experience right in the living room.

E4 modes:

- E4, The Game Unlimited – The main mode of the game, where your objective is to self-destruct and aim for large chain reactions. Your stock (life) is unlimited, so use perfect timing to detonate and score as high as you can. Picking up the right items at the right time will lead you to a whole new experience of the game. Items include - Time Extend (adds time to the game clock), Quicken (quickens the pace of the game), Shield (adds time to the Shield clock) and Multiplier.
- E4, The Game Time Limited – Time Attack version of the main mode.
- S4, Wiz ur Muzik – A mode where the player can implement their favorite music and enjoy a customized E4 experience. Once the track is loaded on the Xbox 360 hard drive, the player can have the software detect the BPM or manually do so by tapping the beats using the controller.
- R4, The Revenge – A genuine shooter mode, featuring up to 100 stages.
- H4, Versus Live – Full online multiplayer mode over Xbox LIVE.
